Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claim 1 (currently amended): A food product comprising, in combination:

a first elongated dough member having a first preselected composition and formed to have into a pretzel configuration having a plurality of open spaces within said first elongated dough member between portions of the cylindrical dough, and said first elongated dough member having a first end and a second end;

a second elongated dough member having a second preselected composition and formed into a spiral configuration and positioned within a first of said plurality of open spaces of said first elongated dough member.

Claim 2 (currently amended): The arrangement food product defined in claim 1 wherein: said first preselected composition of said first elongated dough member is different from said second preselected composition of said second elongated dough member.

Claim 3 (currently amended): The arrangement food product defined in claim 2 wherein:

said first preselected composition of said second elongated dough member is a pretzel dough composition; and,

said second preselected composition of said second elongated dough member is a cinnamon bun dough composition.

Claim 4 (currently amended): The arrangement food product defined in claim 1 wherein: said first preselected composition of said first elongated dough member is the same composition as said second preselected composition of said second elongated dough member; and.

said plurality of open spaces is three.

Claim 5 (currently amended): The arrangement food product defined in claim 4 wherein:
said first end of said first elongated dough member is formed into a spiral to define

said second elongated dough member positioned in said first of said plurality of openings.

Claim 6 (currently amended): The arrangement food product defined in claim 5 wherein:

said second end of said first elongated dough member is formed into a spiral to define

a third elongated dough member positioned in a second of said plurality of openings.

Claim 7 (currently amended): The $\frac{1}{2}$ The $\frac{1}{2}$

said second end of said first elongated dough member is formed into a spiral to define

a third elongated dough member positioned in a second of said plurality of openings; and,

said first end of said first elongated dough member is further formed into a spiral to

define a fourth elongated dough member positioned in said third of said plurality of

openings.

Claim 8 (currently amended): The arrangement food product defined in claim 3 and further

comprising:

said plurality of open spaces is three; and,

a third elongated dough member having said second preselected composition and

formed into a spiral configuration and positioned within a second of said plurality of open

spaces of said first elongated dough member.

Claim 9 (currently amended): The $\frac{1}{2}$ The $\frac{1}{2}$

comprising:

a fourth elongated dough member having said second preselected composition and

formed into a spiral configuration and positioned within said third of said plurality of open

spaces of said first elongated dough member.

Claim 10 (currently amended): A food product comprising, in combination:

a first elongated dough member having a first preselected composition and formed into a pretzel configuration having to have a plurality of open spaces within said first clongated dough member between portions of the cylindrical dough, and said first elongated dough member having a first end and a second end, and said plurality of open spaces is three;

a second elongated dough member having a second preselected composition and formed into a spiral configuration and positioned within a first of said plurality of open spaces of said first elongated dough member; [[and]]

a third elongated dough member having said second preselected composition and formed into a spiral configuration and positioned within a second of said plurality of open spaces of said first elongated dough member[[.]]; and

a fourth elongated dough member having said second preselected composition and formed into a spiral configuration and positioned within said third of said plurality of open spaces of said first elongated dough member.

Claim 11 (currently amended): A food product comprising, in combination:

a first elongated dough member having a first preselected composition and formed into a pretzel configuration having to have a plurality of open spaces within said first elongated dough member between portions of the cylindrical dough, and said first elongated dough member having a first end and a second end; of open spaces is three;

a second elongated dough member having a second preselected composition and formed into a spiral configuration and positioned within a first of said plurality of open spaces of said first elongated dough member; and

a third elongated dough member having said first preselected composition and formed into a spiral configuration and positioned within a second of said plurality of open spaces of said first elongated dough member.
